### EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. Claims 1-4, 6-13, 15-19 and 21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a method and system providing a simplified user interface for allowing visually configuration of a video call with graphical representations of video devices (i.e., the user interface communicating with a video network platform to validate video call configurations and schedule selected video devices so that the user interface ensures that the video call configurations do not include invalid actions, thereby prohibiting the drawings of a directed graph arrow between a first graphical representation of a first video device and a second graphical representation of a second video device unless the video call between the first and second video devices is a valid action).

Applicant's independent claims 1 and 19 each recite, *inter alia*, a user interface for visually configuration a video call with a structure as defined in the specification (page 9-14) including a video call configuration window, and a directed graph relating the icons to represent the configuration of the video devices in the video call, wherein the video call configuration window is operable to allow a user to draw a directed graph between icons that represent compatible video devices in a valid video call configuration and to prohibit a user to draw a directed graph between icons that represent an invalid video call configuration. Applicant's independent claims 1 and 19 comprise a particular combination of element, which is neither taught nor suggest by the prior art.

Applicant's independent method claim 13 recites, *inter alia*, selecting the first graphic to initiate a direct graph arrow originating from the first graphic, selecting the second graphic to draw a directed graph arrow from the first graphic to the second graphic representing a video call between the first and second video devices, determining if the video call between the first and second video devices is a valid action and prohibiting the drawing of a direct graph arrow between the first and second graphics unless the video call between the first and second video devices is a valid action. These steps, in combination of the remaining steps, are neither taught nor suggested by the prior art.

Accordingly, Applicant's claims are allowed for these reasons and the reasons recited in Amendment filed 11/6/2003, 3/24/2004 and 8/25/2004. In addition, it is noted that VTel Corp was split into two divisions on November 2003 including services division and hardware division, which the services division was renamed Forgent network Inc., according to a further Internet search. Thus, Stephens (US PAT. 6,633,324) fails to qualify as prior art against the present application because the present invention was assigned to Forgent Network Inc. and each of the inventors of the present application and Stephens were under a duty to assign inventions to Forgent network Inc. at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
